To Whom it May Concern,I wanted to voice my opinion concerning the issue of the FCC seeking opposition with XM Satellite Radio. I am a new subscriber to XM and haven't been able to turn it off! If the local radio stations were as good as XM then I probably would not have found an interest. However, they are NOT. I am in sales and I drive everyday for at least six hours in a day. XM was an excellent choice for myself to stay awake while driving instead of falling asleep to the same songs and commercials played over and over on local radio stations. It was a great investment and I believe that with our First Amendment rights we are entitled to listen to what we please. It just so happens that XM beleive that same right and they have satisfied my frustrations! SOLD!!!
